

Newsletter No 7 -05

Dear parent /Guardian

Greetings from our school community. It was exciting to see your children back with a lot of eagerness to continue from where the last term had ended. We have introduced tests at every beginning of term and children have gone through them as academic refreshment in all subjects. Good News, we hope this term will be so superb in meeting the learning targets set for our children. This is because we have been joined with the following three new teachers:

- ❖ Mr. Masereka Fasouk from Kibuli Core Primary Teachers' College. While at college, Fasouk worked as a Librarian and at the same time an Assistant Bilal (Mu-adhin) for Moslem Prayers. He is teaching P.4 - P.5.
- ❖ Mr. Kazibwe Musa From the same College who was a Health Minister on the college Guild council and on house council. He is Teaching P.3 - P.5
- ❖ Hamwada Ismael from the same college too and he was the Education minister on the Guild council and a House Speaker. He is teaching P.3 - P.5.

We now have enough hands on the Job and every one is enjoying the team work and spirit.

Absenteeism:

There is a humble appeal from the teacher of your child that please keep your child coming to school days. It is so tiresome and difficult to keep the absent children on the same pace with the ones. We will recognize every child who will not miss any day in this term.

If you are not aware, we have a boarding facility to parents who would find it fitting for the learning of your child. There is also a day care service.

Have a good week.

Middle Class

Greetings from West Ewell members, we thank you for the good work you did during holidays, because we are seeing some signs of improvement in all learning areas. Thank you for such a helping hand.

We also enjoyed the holidays as you might have done because children are telling us good stories about the holidays, especially those who got frequent outings. The turn up was so good, continue encouraging them. This week we have revised the previous work of last term. Thank you for the love and care. Bye

Top Class

Dear Parents, we would like to welcome all our children from holidays and we are also happy our children are back in good conditions and eager to learn although some are still exhibiting some holiday moods but we hope as time goes by they will get erased from them.

This week we are only reviewing the last term's work to set learners into the learning environment. Otherwise we wish you success in your endeavors.

P. 1

Parents/Guardians, we are grateful to welcome you back to the school. This is to thank you for the good care and support you have offered to our children. The turn up was exhilarating and all children are fanatical to learn. We had our beginning of second term tests on Thursday and Friday and the performance is so promising. For a few children who have just joined us, their parents are requested to come and get the guidelines on how reading and writing are supposed to be handled such that they may give a helping hand at home. Thanks.

Kids Corner

By Kasibante Gavin

I started late, on Thursday when we begun our beginning of second term tests. We did English and social studies on Thursday, Mathematics and Science on Friday. The tests were very fine, they were not hard and I even found some new teachers, Mr.Kazibwe Musa and Hamwada Ismael. Nice time our dear parents

Reception class

Our beloved parents, we great you all in the name of the Almighty God. We would like to thank you for returning our children from the holidays in time. We thank those who helped our children during holidays, please keep up with the same spirit for good academic standards.

We are very sorry for those who have been sick for the last term but with prayers everything is possible. May GOD BLESS YOU.

By Tumwebaze Chelsea

In science we learnt about the Human skeleton. And we found out that a skeleton is the frame work of the bones in the body . We also learnt about functions of the skeleton in the body whereby we saw that a skeleton gives shape to the body and it keeps our bodies upright.

In mathematics we learnt about Fractions . We also talked about types of fractions as, proper fractions, improper fractions and mixed fractions.

Primary Five

By Alazewa Phillip

In Science, we looked at respiration and found out that when you breathe in, you take oxygen and when you breathe out its carbon dioxide .We discovered that oxygen help our body in breaking the food we eat to produce energy, like reading, playing football and writing. We looked at respiratory organs like epiglottis, trachea, larynx and lungs and the functions of these organs to our body, the larynx which contains the vocal cord that help us in asking question in class, epiglottis which closes the wind pipe(trachea) to avoid food from entering the lungs.

The following names are of children who performed and behaved very well during the week. These names are displayed on our Golden Tree.

Reception class

- Akoth Faith
- Nakachwa Linda
- Katerega Mark
- Murangwa Benjamin
- Muhairwe Ian Junior

Middle Class

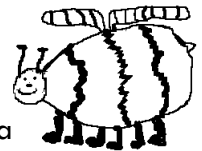

- Kalungi Denis
- Kaluya Bazil
- Mulumba Alkam
- Segawa Rymond
- Ahebwa Michelle

P1

- Kantinti Rebecca
- Jumba Benjamin
- Atwine Kevin
- Nabwire Angella
- Kagoma Lynet
- Maviri Anold
- Nkalubo Ian

P.4
